SCHOOL BUS

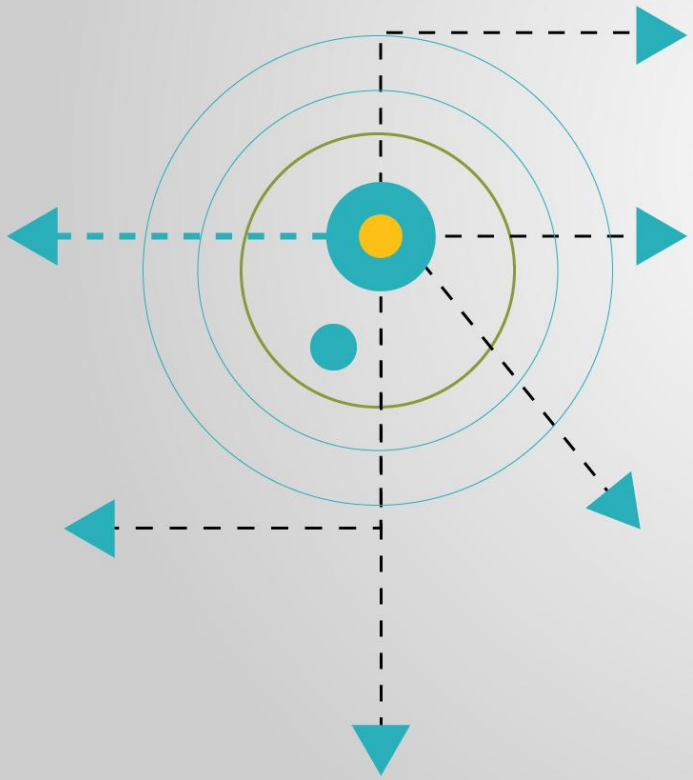

**AUTO ROUTING**

**FEATURES**

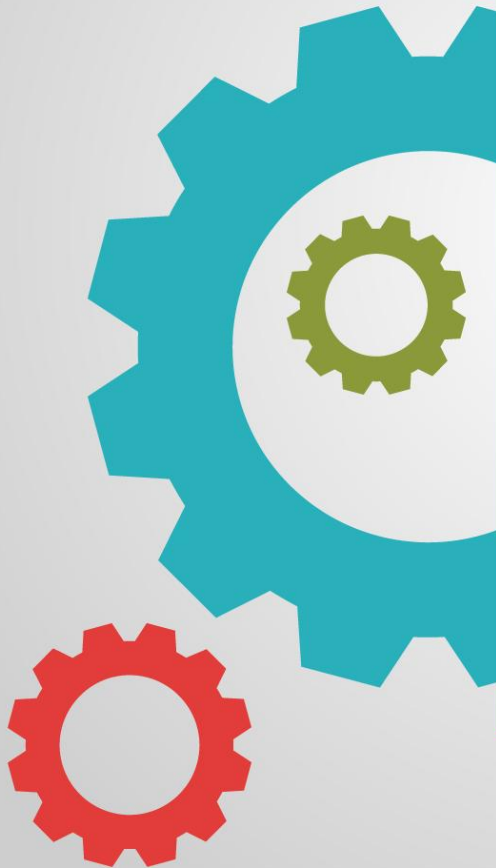

Are you a school transportation manager facing issue in creating school bus routes?

Now it can be done easily with our Auto Routing Feature.

Here are the  
key features

# #1

Creates routes based on shift, pick up point density and vehicle seat capacity

# #2

Verifies and approves  
appropriate routes  
automatically

# #3

Save vehicle running costs  
and hours

# #4

Suggests optimized route,  
trip, vehicle assignments,  
etc automatically

# #5

Performs efficiency  
check for existing  
school bus routes

# # 6

Optimization of vehicle usage, durability, running duration and distance

Wish to have this  
feature in your school  
bus tracking app ?
